Introduction

Did you know that play is the way your child learns? This means it's easy to help your child learn about their world—just play together!

This booklet looks at 5 big areas in which your child learns and develops:

- physical health and well-being
- emotional development
- communication skills and general knowledge
- social development
- language and thinking skills

For each area, this booklet suggests tips for healthy development and ways to help your child learn through play. You will also see books you can read together that match each of the areas.

Every child learns at their own pace. Try a variety of the activities to see what your child is ready to learn today.

Your child will learn best when you are having fun together.

Enjoy!
