

Session Title : Data-Informed Decisions

Presenters:
Dr. Chris Boulter
Kyle Sarka

How can data inform SAC conversations?

- The importance of inquisitiveness
- Trends over time
- Stories from the field
- Connections to SAC mandate

Connections to SAC mandate

- Participate in ongoing discussion, planning, and development for school improvement and performance
- Shared planning and improvement so that student learning benefits from community insight
- Ensure decisions are informed by local priorities and lived experience
- Recommend actions or priorities

What types of data are available?

- Wide and varied
 - Student Success Planning reports
 - Attendance
 - Incident tracking
 - The importance of confidentiality
- Evolving
 - New Literacy data as an example

Discussion Time

- What types of data would you like to have access to at your SAC meetings?
- How might it inform your discussions?

Next steps:

- Ensure your SAC has access to relevant data and understands how to interpret it to support students
- Plan discussions so the SAC can influence and support continued improvement in key areas identified by data
