

I am starting school in September.

It will be nice to see my teachers and my friends.

Some things about school will be different. That is okay. My teacher will tell me what to do.

We may have some new school rules because of something called COVID19

COVID -19 is a virus. A virus is a germ that can make people sick.

I may see people in stores or walking outside wearing a mask. My teacher may be wearing a mask at school. Wearing a mask protects people from getting sick.

My teacher may ask me to wear a mask at school. The mask covers my nose and mouth and fastens around my ears.

I can breathe and I can still see people and talk when I wear a mask.

People look different wearing a mask. That is okay. They are still the same person.

I keep my mask on until my teacher tells me I can take it off. My teacher will show me how to take off my mask.

When I wear a mask I am helping to keep my teachers and friends at school healthy. Wearing a mask will help me stay healthy too.
